

Assessment Component: CIA 3 – Component 2

Digital Ethics Portfolio Presentation on Generative AI

Unit Covered: Unit-5 – Generative AI, Truth, Creativity, and Global Ethical Order

Marks: Conducted for 20-Marks reduced to 10-Marks

Activity Type: Portfolio-Based Group Presentation

Assessment Description:

Students develop and present a Digital Ethics Portfolio focusing on ethical issues, societal impact, and responsible usage of Generative AI technologies.

The portfolio should include multiple creative and analytical components related to a selected Generative AI ethics topic. Students are expected to critically analyze ethical concerns associated with AI-generated content, misinformation, deepfakes, AI creativity, propaganda, copyright issues, and global AI governance.

Students may use Generative AI tools responsibly for content creation, design support, idea generation, and ethical analysis.

The portfolio may include:

- Posters / Infographics
- AI-generated sample content
- Ethical analysis document
- Awareness materials
- Responsible AI guidelines
- Reflection summary
- Supporting references/examples

Deliverables:

- Digital Ethics Portfolio
- Ethical analysis document (2–3 pages)
- Portfolio presentation (5–7 minutes)
- Supporting AI-generated examples/artifacts

Topic Coverage and Individual Participation

The Digital Ethics Portfolio must cover topics from Unit-5: Generative AI, Truth, Creativity, and Global Ethical Order.

The Unit-5 topics include:

- Synthetic reality and epistemic risk
- Ethics of misinformation, deepfakes, and persuasion
- Authorship, creativity, and intellectual labor
- Moral status of generated content
- AI in warfare and propaganda
- Ethics of global AI governance
- Cultural pluralism in AI ethics
- Global North–South asymmetries
- Limits of universal ethical frameworks

Minimum Topic Coverage:

- Each student must take responsibility for at least one distinct Unit-5 topic and contribute to its analysis and presentation.
- Teams may cover more than the minimum number of topics if desired.
- The selected topics should be integrated into the Digital Ethics Portfolio, supported with relevant examples, ethical analysis, creative artifacts, and responsible AI perspectives.
- Equal participation of all team members is mandatory during the portfolio development and presentation.

Evaluation Criteria/Rubric/s:

Sl. No	Evaluation Criteria	Description	Marks	Rubrics
1	Understanding of Generative AI Ethics	Understanding of ethical concerns related to Generative AI, deepfakes, misinformation, AI creativity, propaganda, governance, and responsible AI practices.	4	0–1: Limited understanding of Generative AI ethics concepts. 2–3: Basic understanding with moderate explanation of ethical concerns.
				4: Strong understanding with clear explanation of ethical implications and responsible AI concepts.
2	Portfolio Content & Creativity	Quality, originality, creativity, and relevance of portfolio artifacts such as posters, infographics, AI-generated examples, ethical guidelines, and awareness materials.	4	0–1: Minimal creativity with incomplete or poorly organized portfolio content. 2–3: Satisfactory portfolio

				with relevant content and moderate creativity. 4: Highly creative and well-organized portfolio with meaningful artifacts and presentation quality.
3	Ethical Analysis & Critical Thinking	Ability to critically analyze ethical challenges, societal impact, misuse risks, stakeholder concerns, and governance perspectives related to Generative AI.	4	0–1: Weak ethical discussion with limited critical analysis. 2–3: Moderate ethical analysis with acceptable reasoning and discussion. 4: Strong ethical analysis demonstrating critical thinking and responsible AI awareness.
4	AI Tool Usage & Responsible Practices	Effective and responsible use of Generative AI tools for content creation, idea generation, ethical analysis, and demonstration of awareness regarding AI limitations and misuse.	4	0–1: Improper or minimal use of AI tools with poor understanding of responsible usage. 2–3: Basic use of AI tools with moderate awareness of ethical concerns. 4: Effective and responsible use of AI tools with clear understanding of ethical AI practices and limitations.

5	Presentation & Team Coordination	Clarity of presentation, communication skills, organization, equal participation, teamwork, confidence, and overall effectiveness of portfolio presentation.	4	0–1: Poor presentation and weak team coordination. 2–3: Average presentation with moderate participation and communication. 4: Well-coordinated presentation with confident communication, equal participation, and effective delivery.
